

Enabling Self-Service BI using SAP Analytics Cloud Hands-on Training

1
DAY

Explore how SAP Analytics Cloud helps your organization simplify data to create interactive visualizations and stories with self-service BI, and combine planning, business intelligence and predictive analysis in a single Cloud-based solution. Get hands-on training on how to:

- Reduce IT dependency with agile visualization and exploration on the Cloud
- Leverage predictive and planning capabilities with pre-built templates
- Bring all analytic reporting needs into one system
- Create your own analytics and visualizations and collaborate the same to boost productivity

This training includes instructor-led, hands-on exercises in creating reports and dashboards. We use demo data specifically designed to provide exposure to a range of realistic scenarios.

ABSTRACT

Group and analyze your data

Save time with global filters

Add URL actions

Reveal surface area of the data with scatterplot

Split visualizations into different groups - Trellis

Sort & Rank

Use color to analyze two-dimensional data with heat map

Highlight important data with conditional formatting

Make storyboards interactive

Perform location analytics using maps

Release : Current & prior releases

Prerequisites : Basic Excel Knowledge

Modules Covered : Basic & Advanced

COURSE OVERVIEW

ACQUIRE DATA

Excel, Text, Clipboard (basic hands-on exercise)
SAP: HANA, BW, Universe (part of workshop)
Freehand SQL, Cloud Applications (advanced)

ENRICH DATA

Merging and Appending Data
Editing/Cleansing Data
Building Custom, Date and Geo Hierarchy
Calculated Measures and Dimensions
Formatting Values and Grouping

BUILD VISUALIZATION

Using Geo Maps
Formatting Charts
Basic Prediction and Influence analysis
One-Click Sorting and Conditional Formatting
Perform Running Calculations

EXPLORE DATA

Building Dynamic Storyboards
Use Hyperlink Navigations
Changing Text and Visualization Properties
Data Driven Infographics

SHARING INSIGHTS

Collaborate with Other Users
Manage Events and Comments
Print as PDF Document
Share Content Over Web and Mobile

ADVANCED WORKSHOP

Hands-on with Client Datasources
Publishing to Clients SAP Digital Boardroom
Additional 1 or 2 day Workshop
Best Practices in Self Service BI
Tips and Tricks !

WE ALSO PROVIDE CUSTOMIZED ON-SITE CLIENT TRAINING

Schedule a flexible 2-day training for a class of 20 attendees.

- **Day 1:** 9am-4pm. Core material to enable the business with the tool and get them comfortable.
- **Day 2:** 9am-4pm. Focused on helping trainees with specific questions they might have while exercising with BOC hands-on or with their own datasets to perform effective analysis.

Customer Testimonial

"Our team got real value out of this and I believe we are off to a great start for our SAP Analytics Cloud journey"

"..the exercises were helpful and I have a much greater chance of putting together meaningful information following this class"
