

# Visual BI Document Management for SAP® Lumira

Document Management for SAP Lumira

## BENEFITS

- ⊕ Reduce testing time by identifying changes and taking a more focused testing approach
- ⊕ Gain more insight into upcoming changes and drastically reduce production errors
- ⊕ Keep control over offshore & in-house development and quickly identify project progress
- ⊕ Use impact analysis to plan your next upgrade to avoid any error based on dependencies
- ⊕ Use recovery as your “safety net” on top of regular backups

## HIGHLIGHTS

**TRACK** changes and automatically establish a version history for your dashboards

**COMPARE** versions to monitor development progress and identify changes

**ANALYZE** versions identify dependencies and manage change impact

**RESTORE** specific versions of your dashboard in case of technical problems

**DOCUMENT** your dashboards and use detailed information for further review
