

# SAP BW Upgrade & BW on HANA Migration Accelerator

A Prepackaged & Reusable Solution

## Overview

The SAP BW Upgrade & BW on HANA Migration solution delivers reduced project timelines with shorter test cycles by mitigating some of the operational risks associated with the overall upgrade / migration process.

## What does the solution include?

- ⊕ Pre-upgrade system readiness checklist
- ⊕ Pre and Post-upgrade activity checklists
- ⊕ Test plan templates & test scripts for pre and post-upgrade automated testing
- ⊕ SAP BW Upgrade Test Accelerator for an efficient upgrade process
- ⊕ Validation of authorization & access rights before and after upgrade
- ⊕ Validation of object consistency, query performance & data integrity

## Does Visual BI provide any ancillary services?

Yes. Visual BI can perform a one-time setup and installation of the solution for a fixed fee. We can also manage the entire upgrade or provide testing services, if required.

## Benefits

- ⊙ Reduce project timelines, production downtime & development freeze window
- ⊙ Automate testing efforts to reduce test cycles
- ⊙ Eliminate errors by highlighting queries and InfoProviders that need attention
- ⊙ Reuse solution for future BW upgrades at no additional cost

## Success Story

**Client : An Upstream Oil & Gas Company**

The customer successfully migrated to SAP BW on HANA using Visual BI's SAP BW Upgrade Accelerator solution. They were able to test 186 reports in a span of 35 minutes. A conventional testing process would have conservatively taken 40+ hours (2400+ minutes), thereby delivering 68x efficiency.

**68x**  
Efficiency

In addition, the solution also assured 100% reliable and accurate test results.
