

# Case Study Healthcare Analytics For A Care Provider

## Industry

Healthcare

## Location

United States

## Employees

103,000+

## Function

Sales, Operations, Finance, HR, IT

## Challenges

- Drive cost efficiencies in an environment with very low margins and governed by regulation & compliance
- Lack of effective mechanisms to deliver summarized insights to executives

## Technology

- SAP BW 7.4
- SAP BusinessObjects 4.2
- SAP Crystal Reports Enterprise
- BEx Query Designer
- SAP Mobile BI

## Solutions

- Dashboards & Visualization
- Xcelsius/Qlik to Design Studio Migration
- Mobile BI

- Delivered Enterprise Analytics solutions for multiple business units managing Hospitals, Nursing Centers and Rehab Care facilities.
- Implemented comprehensive Operations Analytics solution that helped executives monitor and manage 17+ KPIs
- Consolidated BI footprint and delivered license cost savings by migrating analytics solutions from Qlikview to SAP
- Rolled out Mobile BI capabilities and leveraged Visual BI Product Extensions (VBX)
