

### Industry

Oil & Gas – Midstream

### Location

North America

### Revenue

3.5 Billion USD

### Challenges

- Legacy analysis applications were not mobile compatible
- Highly complex architecture that handled millions of records of data from disparate sources
- Complex authentication and single-sign-on requirements

### Services Provided

- SAP BOBJ Installation, Configuration and Administration
- SAP Crystal Reports Migration
- Mobile BI
- End to End SSO configuration

- Installed & Configured SAP BusinessObjects, SAP Design Studio, SAP Mobile BI
- SAP BO server sizing, tuning and optimization for effective performance
- Migrated 150+ decentralized Crystal Reports to Crystal Enterprise and published them to BI Platform
- Implemented SSO with user authentication configured in Windows AD, and rolled out SSO to SAP BW & BI platforms
- Executed several other activities such as report scheduling and broadcasting, Universe design to facilitate ad-hoc reporting and automation of periodic maintenance tasks

*"With limited in-house resources, we needed a turnkey solution for the installation and configuration of a BI server. In a matter of days, we were providing executives quick and easy access to their data."*
