

Case Study

Spend Analytics For A Leading Manufacturer

Industry

Manufacturing - Automotive

Location

United States

Employees

30,000+

Function

Spend Management

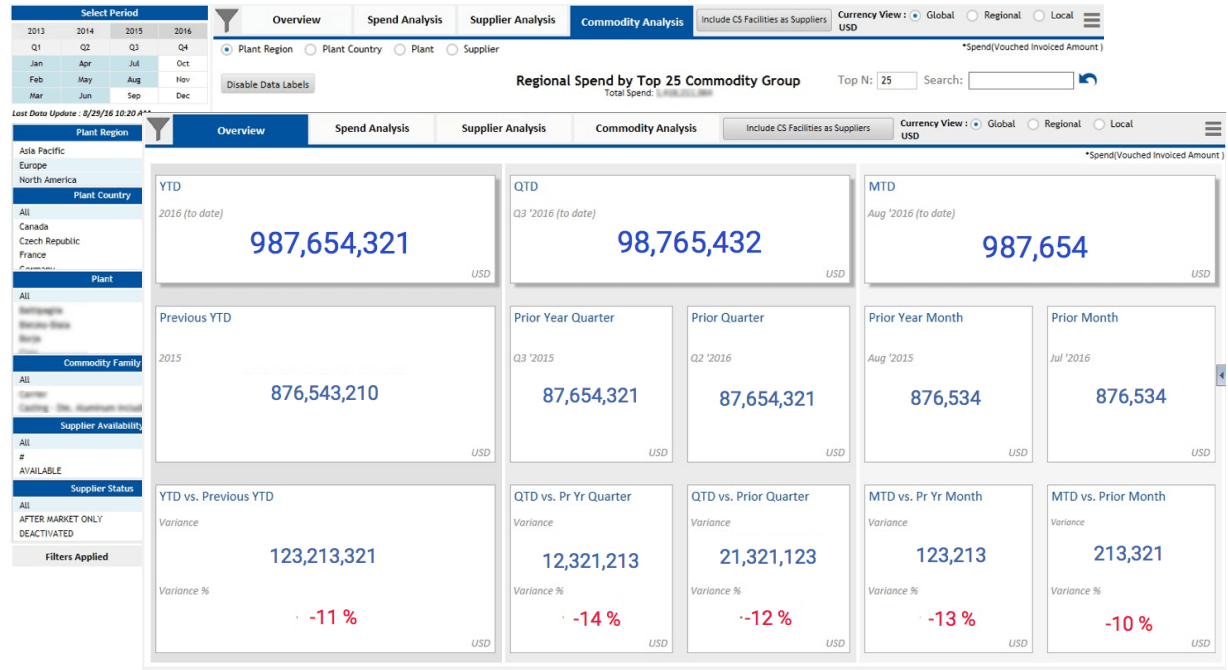

Challenges

Offline gathering & analysis of spend data using spreadsheets leading to:

- Multiple versions of truth
- Lack of reliability
- Wasted man-hours

Solutions

- SAP BW Query
- Development
- SAP Design Studio Product Extensions (VBX)

- Delivered a comprehensive Spend Analytics solution that offered spend insights by vendor, commodity, plant and geography for 100+ business users
- Empowered users with contextual drilldowns to Web Intelligence reports for detailed analysis
- Leveraged rich search & interaction capabilities delivered by Visual BI Product Extensions (VBX):
 - Period Selectors for slicing & dicing time periods
 - 'Text Search' for performing Top 'n' analysis and Vendor/Category search
 - 'Facet Filter' to select one or more dimensions seamlessly
