

# Case Study

## SAP HANA Mixed Architecture Scenario

Enterprise HANA + SAP ECC (without SAP BW)

### Industry

Oil & Gas – E&P

### Location

Houston, TX

### Revenue

~ 6 Billion USD

### Scenario

- Customer wanted to modernize their Legacy Oracle EDW and leverage HANA Enterprise Edition Licensing for HANA as EDW (Side Car DW)
- SAP ECC Data on Oracle was extracted real-time using SLT into HANA DW; Non-SAP Data was extracted into HANA EE via Smart Data Access (SDA)
- HANA Views were built for merging SAP-and non-SAP data before being consumed by reporting & visualization tools
