

VBI View

One Gateway for All BI Content

SAP | Tableau | TIBCO Spotfire | Power BI | QlikSense | SSRS | Files | MicroStrategy

FEATURING AUTO-SYNC

Capture changes to users, reports, folders and authorization updates in BI platforms automatically

Common challenges that limit ROI when using multiple BI platforms:

- + Multiple intelligence silos promote lack of visibility & content replication
- + Limited asset re-use due to lack of centralized metadata & search capability
- + Users challenged with managing multiple credentials and inconsistent user experience across platforms

With VBI View, you can extract the most out of your BI platform investments and maximize your ROI. The product features unique capabilities like Auto Synchronization and Smart Search that eliminate complexity, enable advanced audit and deliver personalization features resulting in a rich and engaging user experience.

The Only BI User Portal You Need

CAPABILITIES

SMART SEARCH

Explore entire repository from all BI platforms; Request access to reports that are unavailable to you

PERSONALIZATION

Reorganize & regroup content from various platforms in user-defined, personalized folders
