

Agile Data Warehouse Using SAP Cloud Platform (SCP)

Industry: US Wholesale Petroleum marketers & Distributors

Employees: ~ 1000

Highlights:

- Installed and configured Smart Data Integration (SDI), BOE, and SAP Cloud Connectors
- SAP ECC data replicated into SAP Cloud Platform (SCP) using SDI
- SAP ECC data replicated as flat files into SCP for older versions of SAP ECC
- Delivered complex views unifying SAP tables into HANA calculation views and established SCP as single source of truth
- Replicated SAP Transactions for Inventory as calc views in SCP for reporting
- Enabled consumption of data from SCP into SAP Analytics Cloud
- Delivered Dashboards and reports across business divisions leveraging the capabilities of SAP Analytics Cloud
- Managed and delivered training for SAP Analytics Cloud
- Delivered best practices for data modelling and analytics
- Implemented business domain based security that was easily scalable
- Validated data between ECC and SCP to establish trust in the system
