

Industry
Oil & Gas

Location
Canada

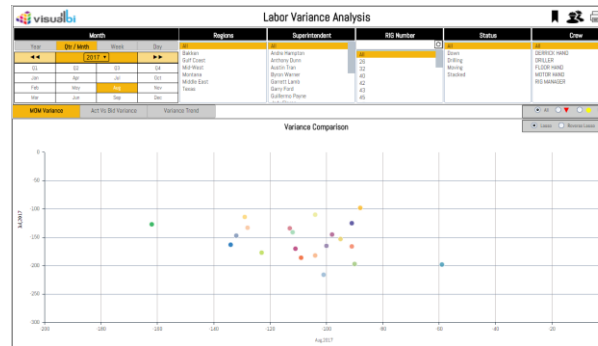

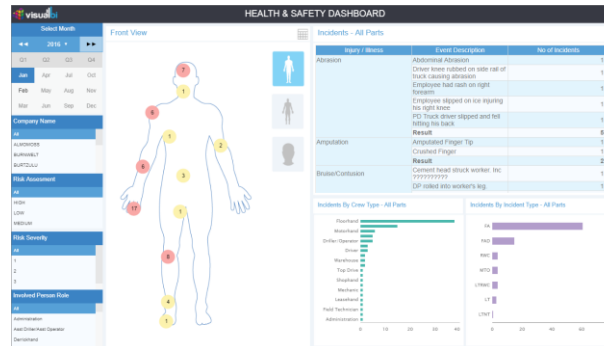

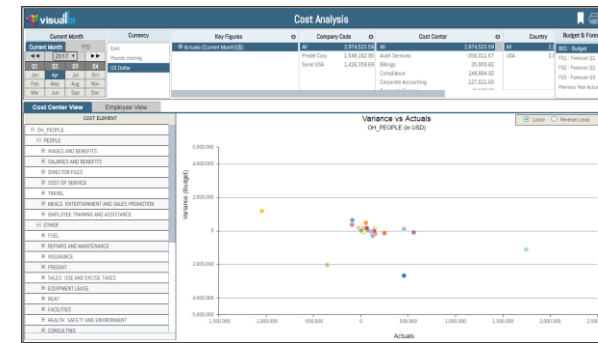

Function
Field Operations, Finance, Health & Safety

Challenges
Customer was unable to harness insights from vast amount of data available for addressing issues such as :

- hourly labour management
- Visibility into overhead costs
- Tracking safety incidents and more

- Solutions**
- BI Strategy
 - SAP BW & Data Modeling
 - Self Service BI

- Delivered multiple SAP BusinessObjects Design Studio applications in various functional areas, enhanced with custom extensions (VBX)
- Streamlined problem resolution processes and delivered real-time access to business-critical data that helped decision-makers conduct quick corrections, thereby limiting losses and maximising profits
- Leveraged unique VBX components such as Period Selector, Facet Filter, Print to PDF, Charts and more
